

# How to use Trinket for Python Coding

## Starting a New Assignment

1. Navigate your web browser to [trinket.io/python](https://trinket.io/python)
2. Log in to the website using your Penn Gmail account
3. In the top right corner of the trinket home page click on **New Trinket** and then select **Python** (Not Python 3)

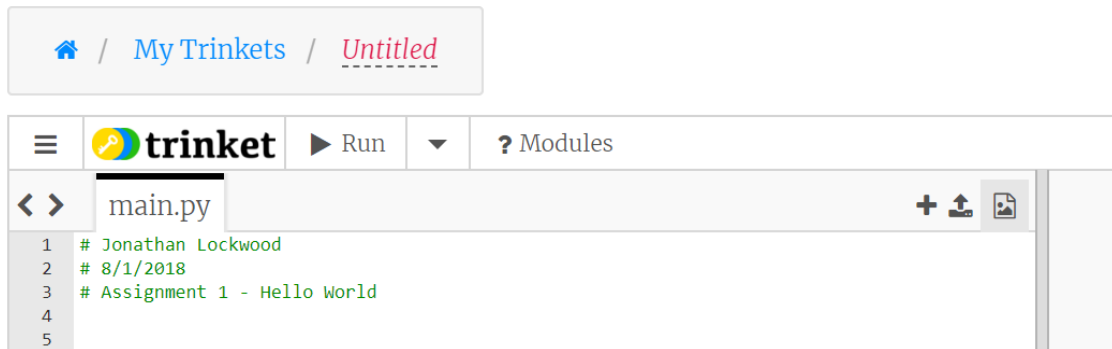

4. You should be directed to a webpage that has an untitled python trinket, in the text box below main.py, you will be able to start writing your own code. You can name the code to fit the programs function.

5. For every assignment you should start the assignment with the following format of

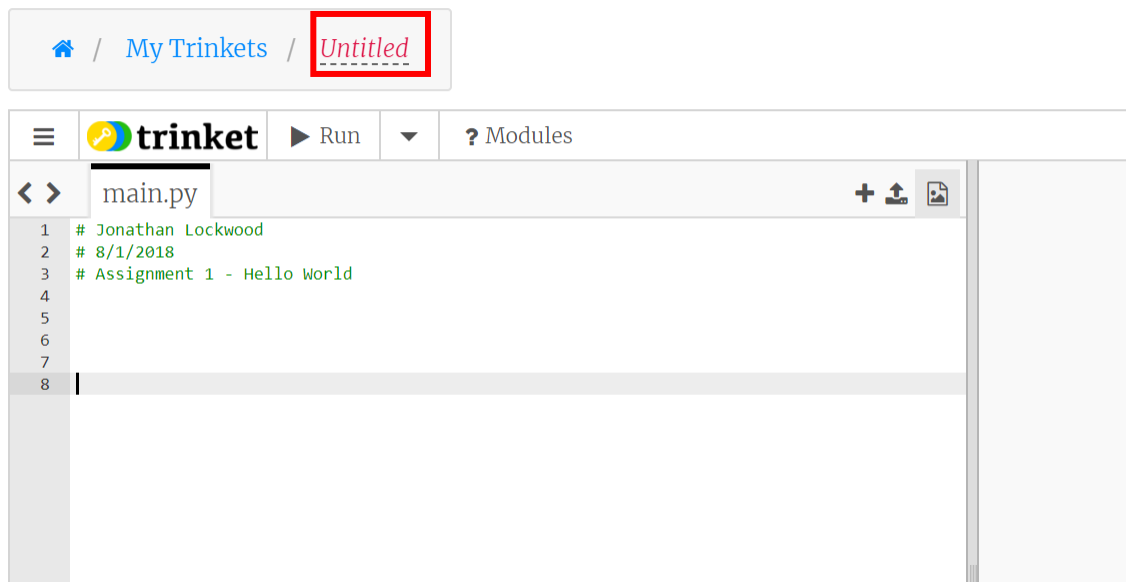

- Name
- Date
- Assignment #

It should look like the following example, be sure to use # to comment the title out of the code.

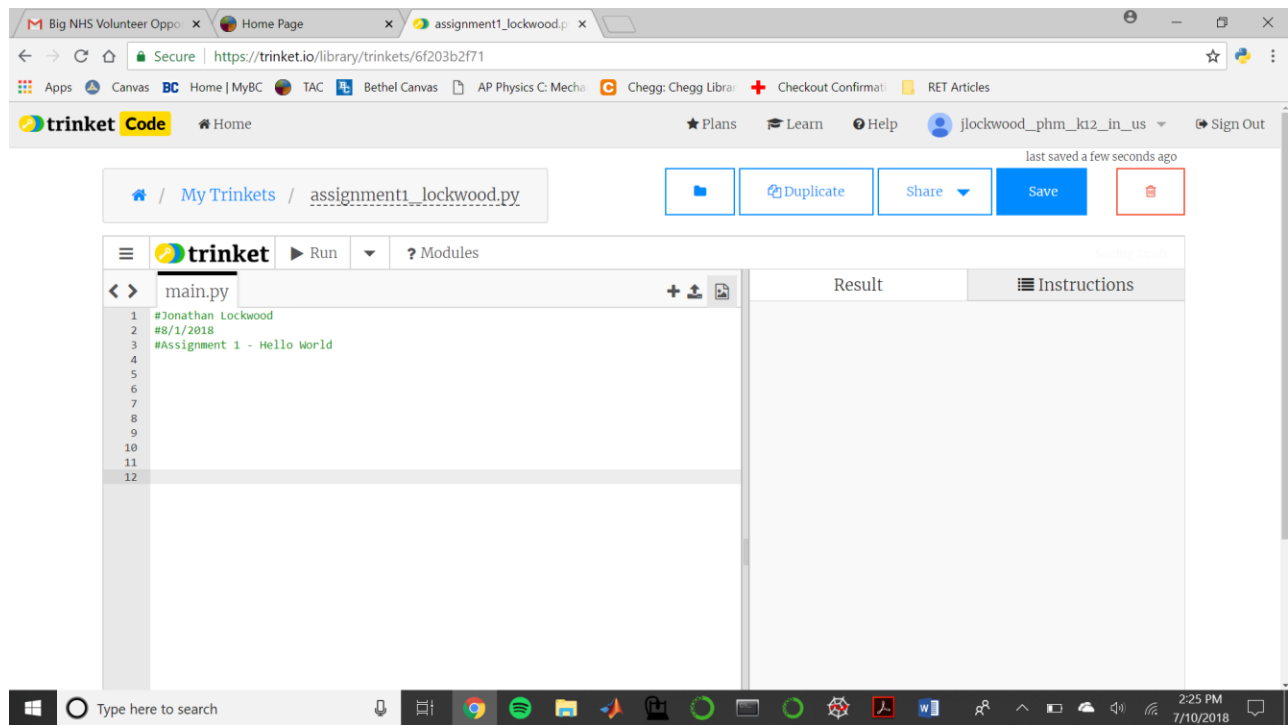

### Submitting Your Code

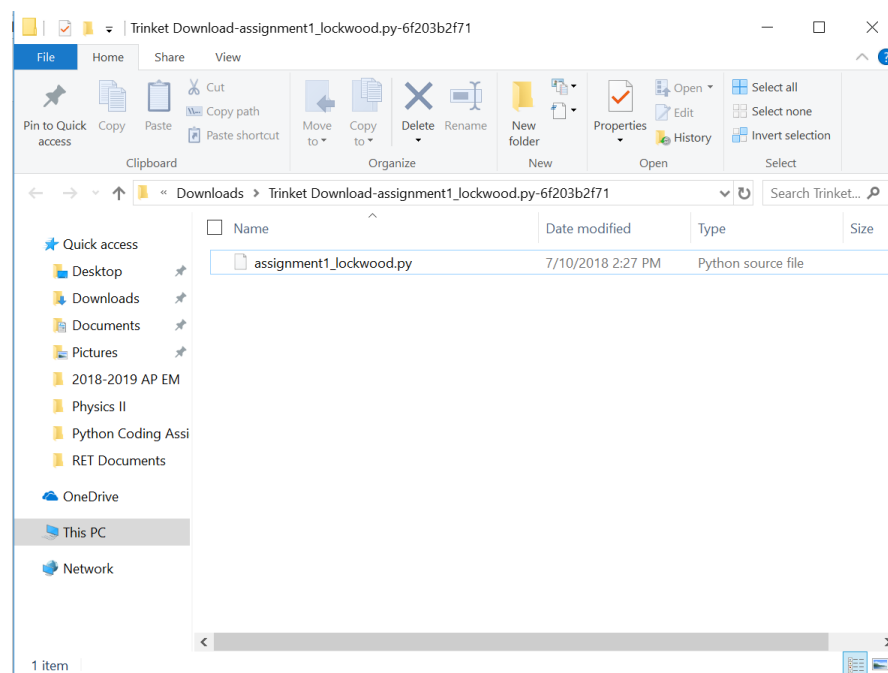

1. Once you have completed your code and it is functioning as expected, click on the red words that say untitled at the top of the page and change the title to fit the following format - *assignment#\_lastname.py*

2. The title should look something like this after you have clicked save

- Click on the share button and select download, after downloading, rename the file downloaded using the same format as the previous step.

- Once the file is appropriately named, you can submit the file to the appropriate Canvas assignment
